RECTO COLITIS: A CLINICAL STUDY DEMONSTRATES THE OBVIOUS BENEFITS OF NUTRIPUNCTURE

- Introduction

Recto colitis is the result of a change in the terrain of the body’s mucous membrane, typically caused by its environment. Specific combinations of trace minerals make it possible to cause or change the balance of the terrain of the individual and in particular of the mucous membrane.

A clinical study conducted for 2 months with 10 volunteers suffering from hemorrhagic recto colitis highlights a rapid improvement in their condition.

In addition to debilitating pain, hemorrhagic recto colitis typically calls for heavy or general treatments, often resulting in adverse effects. However, a clinical study supports the effectiveness of trace element association of the range of the “Nutri” on the intensity of the pains and the standardization of the transit, without any side effect.

- The Clinical Study

The study was carried out by Therapeutic Documentation and Research Center of Donzère on 10 volunteers, aged from 18 to 65 years, suffering of hemorrhagic recto colitis for more than 3 months.

Excluded from the study were the subjects demonstrating mental distress or psychological dysfunction, including those subjects receiving antidepressants or nerve sedatives, as well as subjects presenting a severe associated pathology, likely to involve hospitalization.

- Protocol Used

All followed the protocol until the end, for 2 months:

Chew a continuation of Nutri, apart from the meals and according to the order indicated
Take the complete protocol each time.
During the 1st month: chew a succession of 7 Nutri pills morning, midday and evening, remotely of the meals and in this order.

**Protocol Part 1:** Nutri Yin-Nutri Yang - NUTRI 05 - NUTRI 11 - NUTRI 30 - NUTRI 02 - NUTRI 04

During the second month: chew the same continuation of Nutri, morning and midday, is 2 times per day, remotely meals + 2 other continuations of 5 Nutri, 1 time per day, in the order indicated, outside meals.

**Protocol Part 1:** Nutri Yin-Nutri Yang - NUTRI 05 - NUTRI 11 - NUTRI 30 - NUTRI 02 - NUTRI 04

**Protocol Part 2:** NUTRI 05 - NUTRI 19 - NUTRI 16 - NUTRI 38 (M) /37 (F) - NUTRI 30

**Protocol Part 3:** NUTRI 12 - NUTRI 03 - NUTRI 26 - NUTRI 38 (M) /37 (F) - NUTRI 19

* M: Specific Nutri for the man, F: Specific Nutri for the woman.

Discussions and clinical examinations conducted every 15 days made it possible to follow the evolution of the subjects and to check the efficacy of the protocol.

### Results

**PAIN OF STOOLS**

SUPPRESSION OF PAIN IN 70% OF CASES
2 people exhibiting exceptional pain are relieved within 15 days.

- **D0:** without pain
- **D1:** weak pain
- **D2:** pain intense and hard to bear.
- **D3:** important pain, requiring the use of calming

**QUALITE DES SELLES**

STOOLS BECOME NORMAL FOR 70 % OF THE CASES

- **S0:** stools bleeding and frequent of about 6 per day
- **S1:** stools with traces of blood and rather frequent of about 4 per day
- **S2:** stools with few traces of blood and about 2 per day.
- **S3:** stools normals
The results obtained by the protocol reinforce the effectiveness of Nutri to help the body to face the volatility of the environment, and to control the operation of the cellular exchanges within the body in a general way. They constitute a complement without side effect, nor contraindications. Nutripuncture offers an alternative to aggressive therapy typically utilized for treatment of recto colitis.

Nutripuncture

Nutripuncture focuses on the deviations of the vital currents, which form the ground on which develop functional disorders, then organic disorders. The purpose of Nutripuncture is to reinforce the vital currents and support the self-regulation of the body. Nutripuncture developed in particular the study of the bonds between the meridian lines of the body and the behaviors, and looked further into the psycho-physiology of the bodies, thus bringing a new comprehension of the phenomena known as “psychosomatic.”

Thanks to its major informative action at the cellular level, Nutripuncture offers, in addition to a widened comprehension of human health, the possibility of correcting the dysfunctions of the body and psyche, in addition to restoring the body’s overall durability and balance.

Nutris are a range of 40 products containing minute trace elements. They were conceived to support cellular balance and to reinforce the body’s cellular make-up in harmony with the stimulation and interaction with the environment in which the body resides.
